

WHO WE ARE

Changing the way Africa sees *autism*

Africa Autism Alliance is a continent-wide movement for autism awareness and inclusion. We train the people and organisations at the front line of everyday life, so that individuals with autism and their families are understood, respected and fully included.

OUR MESSAGE

Teachers feel overwhelmed. Parents feel alone. Systems feel underprepared. Africa Autism Alliance steps into that space with a different message: *You are not alone. Your child is not broken.* We build environments that honour who they are.

OUR VISION

An Africa where autism is understood without fear, embraced without stigma, and supported without limitation.

OUR MISSION

To ignite a continent-wide movement that changes how Africa sees, understands, and supports autism.

Small shifts, *multiplied*

LED BY

By raising awareness and training the people who stand at the front lines of society – teachers, nurses, receptionists, police officers, cashiers, HR teams – we start to change everyday experiences for individuals with autism and their families.

A little understanding at a school gate, a calmer response at a clinic, a more patient approach at a checkout counter – these small shifts, multiplied over millions of interactions, transform lives.

WHAT WE DO

Five ways we change *everyday life*

- | | | |
|----|---------------------------------------|---|
| 01 | Awareness training | Structured sessions for workplaces, public institutions and service providers that replace misconceptions with practical understanding. |
| 02 | Practical education | Hands-on skills: communication strategies, recognising sensory triggers, responding to overload and creating calm spaces. |
| 03 | Sensory-friendly guidelines | Clear guidance on lighting, noise, crowds, signage, waiting areas and workflow. |
| 04 | Autism-Inclusive Certification | Organisations that complete training and meet the standard earn the certificate, badge and Alliance membership. |
| 05 | Community advocacy | Public campaigns, school engagement, media outreach and community dialogue to reduce stigma. |

OUR CORE VALUES

- | | |
|---|--|
|  <p>Empowerment through knowledge</p> |  <p>Awareness that transforms communities</p> |
|  <p>Inclusion as a human right</p> |  <p>Systems change, not short-term solutions</p> |

WHO'S IN THE NETWORK

- Medical experts

Doctors

Dietitians

Nutritionists

Therapists

Parents

Educators

Community leaders

And organisations from the corporate, retail, hospitality, finance, education and public service sectors.
